---

It gives me immense pleasure to announce the publication of Volume 5, Issue 2 of “**Brainwave: A Multidisciplinary Journal**”, published by Brainware University, West Bengal, India. The Journal focuses on multidisciplinary research in emerging areas. It is an open access, double blinded peer reviewed Journal which involves online submission and timely publication with high visibility. The objective is to disseminate the novel contents of the accepted articles in the society.

The members of the editorial board, editorial advisory board and the reviewers possess distinguished careers in their respective fields. They are committed to providing unbiased evaluation of the submitted manuscripts and ensuring reasonable time gap between the submission and final publication.

Finally, I extend my heartfelt thanks to the contributing authors who have selected our Journal as the platform for surfacing their research work. I am quite confident that authors must have enjoyed the pleasant and intellectual experience during their tenure with us.

I am also grateful to the concerned stakeholders who have ensured timely publication of this issue of the Journal.

I am of firm belief that the profile of the Journal can be improved further with the help of constructive suggestions of the readers and the article contributors.
